PROFILE

Senior Fullstack Engineer with extensive experience building scalable product platforms and cloud-based business-critical systems.

Strong background in backend engineering, system integrations and high-traffic digital platforms across international environments.

Experienced in designing and operating production AI features, including OpenAI API integrations, retrieval-augmented generation pipelines and embedding-based search systems.

CORE SKILLS

Backend & APIs
.NET Core, Node.js, REST APIs, system integrations

Frontend & Product UI
React, Next.js, TypeScript, Tailwind CSS, shadcn/ui

Cloud & DevOps
Google Cloud Platform, AWS, Docker, CI/CD

AI Systems
OpenAI APIs, RAG pipelines, embeddings, MCP

Databases
PostgreSQL, MongoDB, Redis, SQL Server

LANGUAGES
Italian — Native
English — Professional

EXPERIENCE

July 2021 – Present | Senior Fullstack Engineer
HomeFood (Cesarine.com)

- Core contributor to an international product marketplace platform serving 250k+ monthly active users

- Designed and maintained backend systems supporting 15k+ yearly orders and 42k+ yearly customers

- Built and operated production AI-powered features using OpenAI APIs (RAG pipelines, embeddings, MCP-based integrations)

- Developed internal backoffice systems supporting operations and partner management

- Contributed to cloud infrastructure and CI/CD pipelines on Google Cloud Platform

2016 – 2021 | Senior Software Engineer (R&D)
Yoox Net-A-Porter Group

-Worked in cross-functional R&D teams building experimental and production-ready digital products

- Contributed to virtual try-on, conversational commerce and visual similarity search systems

- Designed backend services supporting cross-brand digital platforms

2011 – 2016 | Senior Software Engineer / Project Lead
Deltatre

- Technical lead for teams delivering large-scale sports broadcasting platforms

- Built high-traffic consumer-facing platforms and live event streaming systems
- Supported real-time data processing pipelines and on-site Olympic Games operations

1997 – 2011 |Software Developer

Freelance & Early-stage Startups

- Built fullstack applications and backend systems for startups and small businesses
